Ladders and scaffold systems

Ice-free scaffold system

– Removal of snow and ice
– Maintenance and cleaning work

QUALITY Since 1900

www.krause-systems.com

More traffic safety on the roads!

Important hint according to §1 par. 2 StVO!
According to the road traffic regulations each vehicle driver must clear its vehicle before departure by e. g. ice, snow and branches.

Ice-free scaffold system

– Removal of snow and ice
– Maintenance and cleaning work

All vehicle drivers are responsible for a roadworthy condition of their vehicles. Each entrepreneur is obliged to instruct its drivers.

According to paragraph § 1 of the road traffic regulations (2 StVO) no traffic participant may be endangered or jeopardized. In case that a vehicle loses for example snow or ice pieces during the journey, an offence has been commited.

Removal of roof loads such as ice, snow, branches, etc.

Cleaning and maintenance work on side walls.

KRAUSE additional service:

+ On-site assembly
+ Safety inspection – in accordance with the requirements of the Ordinance on Industrial Safety and Health for work equipment

TÜV SÜD

KRAUSE hint:

In any case do not start without a prior check. Dangerous „roof loads“ such as ice, snow, branches and water must always be removed.

Safety under any weather conditions

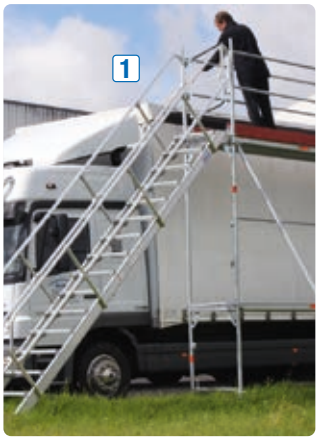
Maintenance and cleaning works are extremly safe and comfortable due to quadrangular side protection and perforated steel platforms in all weathers.

3 meter high platform made of scaffold system parts

Optimal access to any truck due to 3 m standing height. Total length may be altered individually with 3 m field width. Due to height-adjustable foot plates the system can also be used on uneven ground.

Economical and flexible application throughout the year

With 2 working levels (1st level can be safely used with accessories “rail extension set” [1]) the scaffold may be used all-season for e. g. for truck maintenance or cleaning works. It may be used free standing (incl. outriggers) outdoors or fixed to a wall.



Non-slip, wide and comfortable stair access

The driver comes up to the working platform fastly and safely in order to remove the roof by snow and ice. The safety barrier set ([4]) prevents unauthorised access to the system.

Accessories:

[1] Rail extension set

Platform size:
6 m: Art.-No. 970121
9 m: Art.-No. 970138
12 m: Art.-No. 970145
15 m: Art.-No. 970152

For the complete 1st level use

+ Access ladder
+ Front railing
+ Rail struts (not illustrated)

[2] Ice sweeper **Art.-No. 970091**

+ Length approx. 2.40 m, width approx. 0.60 m
+ Extra long shaft
+ Flexible shaft holder can be adjusted to the desired position by tightening the nut
+ Push – pull option
+ Smashing of ice sheets due to hard PVC material
+ One side made with firm aluminium, one side made with solid rubber bar

[3] Ice sweeper holder

Art.-No. 970305 (1 pair in a set)

+ For mounting the ice sweeper on the ice-free scaffolding
+ Easy to assemble

[4] Safety barrier set with warning panel

Art.-No. 970176

+ Against unauthorised access

[5] Steel plate **Art.-No. 970183**

+ As base for staircase and vertical frame
+ Incl. rubber base against slipping

Further examples for commercial vehicle accesses:

Mobile ice-free scaffold system

Mobile, height-adjustable working platform

Mobile maintenance platform

Mobile access to the loading area
